PRINT & COPY USAGE TRACKING & REPORTING

- Tracks all local USB printing, network printer and MFP usage, including copy, scan and fax
- Wide range of standard report templates out-the-box. Over 100 report types available covering usage & cost savings
- Tracks usage by user, group, department, device, location and more...
- Schedule and distribute reports by email
- View reports online as PDF, or convert and export data in multiple formats including XML, CSV & Microsoft Excel
- NO requirement for print servers to track print usage

RULES-BASED PRINTING

- Create powerful print rules and policies through easy-to-use user interface
- Define rules and policies by user, group, department, printer and device group, application type, print driver and more...
- Control user access to color for print & copy
- Set print policies such as force duplex or print quality
- Set minimum and maximum page thresholds by print device or device type
- Enforce print policies by application type
- Set print and copy quotas by user, group or cost account
- Easily create and deploy any print rule through a powerful scripting engine
- Influence user behavior through informative messages via 'pop-up' notifications
- Customize and brand user notifications

QUOTA MANAGEMENT

- Set print and copy quotas by user, group, price, Cost Account, click, color/mono, or page
- Create multiple price lists for different users or Cost Accounts
- Synchronize quotas across multiple PriApps servers
- Create print and copy rules based on user quotas
- View user quotas on managed MFPs and workstation notifications

CENTRALIZED PRINT DRIVER MANAGEMENT & DEPLOYMENT

- Eliminate print servers by centrally managing, deploying and updating 1000s of printers and drivers from a single PriApps server
- Easily migrate existing printer infrastructure from print servers
- Automatically import and sync printers, computers and users from LDAP / Active Directory
- Import floor plans, drag and drop users, computers and printers into Organizational Model

CENTRALIZED PRINT DRIVER MANAGEMENT & DEPLOYMENT

- Intuitive self-service portal with floor plans helps user easily locate and install printers
- Set print driver defaults for users and groups, such as duplex or mono only
- Easily add, delete and update printers and drivers across the entire network
- Available as push and pull driver deployment options

MFP AUTHENTICATION & SINGLE SIGN-ON (SSO)

- Full Single Sign-On (SSO) with all native MFP apps and compliant 3rd Party solutions
- LDAP / AD Sync for seamless user management
- Full user authentication via ID cards, smartphones, mobile app, network credentials, Google account, and PIN
- Enforces multiple methods of authentication for high security applications - for example, ID card & PIN
- Permission based access to MFP services and apps - print, copy, scan & fax
- Control user access to color for print & copy
- Allow users to self-register ID cards
- User credentials fully encrypted through SSL and Kerberos
- Authentication via Mobile App using QR-code or NFC (*dependent on device*)

SECURE PRINT RELEASE / PULL PRINTING

- Release print jobs at ANY MFP or printers via Embedded MFP App, ID cards, PIN, web browser or Mobile app
- Embedded App available for CopyStar MFPs, DEVELOP MFPs, Konica Minolta bizhub OpenAPI MFPs, Kyocera HyPAS MFPs, OKI sXP MFPs, Ricoh ESA & SOP MFPs, Sharp OSA MFPs, Toshiba e-BRIDGE MFPs, Triumph Adler MFPs, UTAX MFPs & Xerox EIP MFPs. Embedded support for HP & Lexmark MFPs scheduled for Q2 2019
- Change print job attributes via Embedded app - for example convert color jobs to mono, simplex to duplex, increase the number of copies
- Configurable options to purge held print jobs - for example, delete all print jobs not released daily, weekly, or monthly
- Retain any print job held in the PriApps myQueue when released
- Allows users to print directly to network printers & MFPs using PIN release
- Supports delegate printing - allow users to release print jobs on behalf of others

MOBILE, GUEST & HOSPITALITY PRINTING

- Allows user to print from ANY mobile device, including Chromebooks, to ANY network print device
- Mobile apps available for iOS and Android devices
- Allow users to self-register multiple mobile devices such as smartphones and tablets
- Supports AirPrint and Google Cloud Print (GCP)
- Submit documents for printing by mobile app, email, or secure webpage upload
- Configurable email confirmations for all mobile print jobs
- Print a wide range of document formats, including Microsoft Office documents
- View and release print jobs in the PriApps myQueue on ANY print device from PriApps mobile apps

MOBILE, GUEST & HOSPITALITY PRINTING

- Supports Guest printing and hospitality hotspot printing

COST RECOVERY & BILLING

- Create pricing models by Client, by Project, by Department, etc.
- Easily export billing data as CSV, XML or in Microsoft Excel format
- Assign print, copy, scan and fax usage to specific Clients, Projects, Departments etc.
- Allow users to allocate all MFP and printer usage to multiple accounts
- Create different pricing models by device type, usage type, or specific page attribute
- Select cost codes directly at the MFP

GENERAL

- Browser-based Admin UI accessible from any mobile device
- Automatically configure MFPs from within PriApps admin UI
- All features available on supported MFPs through a Fiery server when using a 'pass through' IP address
- Tracks, manages & controls user printing from any platform to any print device
- Output management server at the core - eliminates the need for Windows and other print servers
- Scalable solution from small and medium sized organizations to multi-national corporations
- High availability architecture - every PriApps server acts as failover for all others. Not limited to Master / Slave architecture
- PriApps services can be distributed across multiple PriApps application servers, for example driver management, usage tracking, rules-based printing, MFP authentication, pull printing...
- Small footprint PriApps application servers available for remote/satellite office locations
- Local Agent offers built-in redundancy for print usage tracking, rules-based printing, Cost Recovery and driver management in event of network outages and PriApps application server availability
- On-premise & Cloud-based versions available
- Serverless and Cloud-based options available for Print Usage Tracking, Rules-based Printing, Quota Management, Cost Recovery and Centralized Driver Management modules

INTEGRATIONS

- Integrates to leading billing, case management, client matters systems for Cost Recovery & Billing
- PriApps Mobile Print module integrates to 3rd party pull printing applications, such as Equitrac & Papercut
