

PriApps Touch-Free Feature Matrix

PriApps Touch-Free is a completely contactless Single Sign-On (SSO), Print, Copy, Scan & Fax solution for printers and MFPs. It allows organizations to comply with social distancing guidelines and helps mitigate the spread of the COVID-19 Coronavirus.

For more information or a full feature list of the complete PriApps Product Suite, please contact us at info@priapps.com or visit www.priapps.com

CONTACTLESS MOBILE APP

- Contactless Single Sign-On (SSO). Authenticate at an MFP to obtain permission-based access to print, copy, scan and fax functions and 3rd party applications, using your smartphone or tablet
- Contactless Secure Print Release. Release print job(s) at any network printer or MFP
- Contactless Scan workflows. Perform scan-to-me, scan-to-email, and scan-to-folder workflows on an MFP directly from your smartphone or tablet
- Change scan settings, including color, sides, document source, format, orientation, rotation and resolution
- Name scan documents or use pre-defined naming protocols that include device name, date & time, and user
- Contactless Copying. Copy documents without having to touch the control panel of an MFP
- Change copy settings including # copies, color, sides, document source, paper type, and advanced functions such as stapling & hole punching
- Contactless Fax. Fax documents from an MFP without having to touch the control panel

PRINT & COPY USAGE TRACKING & REPORTING

- Tracks all local USB printing, network printer and MFP usage, including print, copy, scan and fax
- Access a wide range of standard report templates out-the-box. Over 100 report types available covering usage & cost savings
- Tracks usage by user, group, department, print device, location and more...
- Report print usage by application type, including differentiating G-Suite applications within the Chrome browser
- Tracks over 100 data attributes for each job, including Document attributes, User attributes, Printer/MFP attributes, Application attributes and more...
- Easily create simple and complex pricing models for chargeback reports
- Assign pricing to print, copy, scan & fax
- Assign detailed pricing to color, paper size, and finishing elements such as stapling & hole punching
- View reports online or download in PDF, MS Word, Excel or PPT format
- Export data for offline analysis in CSV or XML format
- Schedule reports to groups and users by hour, day, week or month, and distribute by email
- View Live Usage for any User or Print Device
- Visualize & model data in Microsoft Power BI for free

PRINT & COPY USAGE TRACKING & REPORTING

- NO requirement for print servers to track print usage
- Does NOT require external 3rd party database licenses, even for a distributed deployment

SINGLE SIGN-ON (SSO) FOR MFPS

Fully functional Single Sign-On (SSO) application for MFPS that provides permission based access to MFP services and compliant 3rd party apps

- Automatically synchronizes with LDAP / AD for seamless user management (NOTE: NO passwords are ever accessed or stored by PriApps)
- User credentials fully encrypted through SSL
- Multiple methods for user authentication including ID cards / security access badges, PriApps app for smartphones & tablets, or simply entering network credentials, shortcode or PIN at the MFP control panel
- Touch-Free authentication via Mobile App
- Supports multi-factor authentication for high security applications – for example, ID card & PIN
- Allow users to self-register ID cards / security access badges, so no integration to existing door access systems is required
- Allows for permission-based access to native & 3rd party MFP apps and services – Print, Copy, Scan & Fax
- Control user access to MFP functions and features including color, simplex/duplex, email, USB storage, e-filing
- Supports one-touch scan-to-email and scan-to-Folder workflows from the MFP control panel or mobile app

The PriApps SSO app is currently available for the following MFP brands and models:

- Brother BSI MFPS *
- CopyStar HyPAS MFPS
- DEVELOP MFPS
- HP OXPd MFPS
- Konica Minolta bizhub OpenAPI MFPS
- Kyocera HyPAS MFPS
- Lanier ESA MFPS
- Nashuatec ESA MFPS
- OKI sXP MFPS
- Olivetti HyPAS MFPS
- Ricoh ESA & SOP MFPS
- Samsung XOA MFPS
- Sharp OSA MFPS
- Toshiba e-BRIDGE MFPS
- Triumph Adler HyPAS MFPS
- UTAX HyPAS MFPS
- Xerox EIP MFPS

(* Due for release Q3 2020)

PriApps continues to expand its support for other MFP brands, and a number are currently in R&D for release in 2020. Please check with PriApps to find out when embedded support for your brand or model will be available

SECURE PRINT RELEASE / PULL PRINT

- Allows users to Securely release print jobs at ANY network printer or MFP via an embedded MFP App, ID cards / security access badges, PIN keypad, web browser, or Touch-Free mobile app for smartphones and tablets

SECURE PRINT RELEASE / PULL PRINT

- Users release jobs from their own personal PriApps myQueue. Jobs are 'printed' to the PriApps myQueue in exactly the same way they are printed to any other printer
- Documents can also be sent to the PriApps myQueue from mobile device, uploaded via a web browser or emailed
- Works with Single Function Printers (SFPs) as well as MFPs/Copiers
- Supports the printing of ANY document format, from ANY operating system or computing device, including PCs, MACs, Chromebooks, iOS, Android & other smartphones & tablets, UNIX, LINUX, AS/400, Mainframe
- All Secure Print Release functions available through the PriApps Touch-Free mobile app
- Release print jobs using the control panel of MFPs. The embedded PriApps app for MFPs is currently available for the following brands and models:
 - Brother BSI MFPs *
 - CopyStar HyPAS MFPs
 - DEVELOP MFPs
 - HP OXPd MFPs
 - Konica Minolta bizhub OpenAPI MFPs
 - Kyocera HyPAS MFPs
 - Lanier ESA MFPs
 - Nashuatec ESA MFPs
 - OKI sXP MFPs
 - Olivetti HyPAS MFPs
 - Ricoh ESA & SOP MFPs
 - Samsung XOA MFPs
 - Sharp OSA MFPs
 - Toshiba e-BRIDGE MFPs
 - Triumph Adler HyPAS MFPs
 - UTAX HyPAS MFPs
 - Xerox EIP MFPs

(* Due for release Q3 2020)

PriApps continues to expand its support for other MFP brands, and a number are currently in R&D for release in 2020. Please check with PriApps to find out when embedded support for your brand or model will be available.

- Change print job settings at the MFP control panel or via the Touch-Free mobile app including color, # sides, # copies, staple and hole punch options and whether or not to retain the job after printing
- Provides traffic light (Red / Amber [Yellow] / Green) status indication on the MFP control panel of which jobs can be released at any specific device
- Control which print devices users are allowed to release jobs at
- Supports delegate printing – allow users to release print jobs on behalf of others
- Automatically purge unreleased print jobs after configurable time intervals, for example jobs can be deleted overnight or every 3, 7, 10 days or never
- Does NOT require print servers to function

MOBILE & BYOD PRINTING

- Allows users to print from ANY mobile device, including iOS, Android & other smartphones & tablets, as well as Chromebooks, to ANY network printer or MFP
- Supports ANY document format including PDF, Microsoft Office, G Suite, Open Office, CAD drawings, graphics packages etc.

MOBILE & BYOD PRINTING

- Allows organizations to track and control printing from Mobile devices and for BYOD initiatives
- PriApps Mobile app available for iOS and Android devices, although it is not a mandatory requirement in order to print from mobile devices
- Allow users to self-register multiple mobile devices such as smartphones and tablets
- Supports printing directly via AirPrint, Google Cloud Print (GCP) and Microsoft Universal Print
- Submit documents for printing by mobile app, email, or secure webpage upload
- Configurable email confirmations for all mobile print jobs
- View and release print jobs in the PriApps myQueue on ANY print device from PriApps mobile apps
- Supports Guest printing and Hospitality printing

SCANNING & DOCUMENT CAPTURE

- One touch Scan-to-Me options available via Touch-Free app and embedded MFP app
- Scan-to-Email via Touch-Free app and embedded MFP app
- Scan-to-Folder via Touch-Free app and embedded MFP app

GENERAL

- Elegant & beautifully crafted browser-based Admin UI makes PriApps simple and easy to configure and administer
- Auto-discovery of printers & MFPs minimizes setup and configuration
- Node-based architecture allows for centralized, de-centralized and distributed on-premise deployments at no extra cost
- High availability architecture – Not limited by a simplistic Master / Slave architecture
- Embedded MFP apps support Offline Mode in the event a PriApps Application server is not available
- Output management server at its core eliminates the need for Windows and other print servers for any function
- No additional software required – PriApps is not dependent on a 3rd party database or web server to function
- Scalable solution from small & medium sized organizations to multi-national corporations
- Print job archiving
